

# Bibliography

- Artin, E. 1944. *Galois theory*. Notre Dame Lectures, University of Notre Dame Press. Second revised edition.
- . 1988. *Galoissche Theorie*. Thun: Verlag Harri Deutsch. German translation by V. Ziegler.
- Artin, M. 1991. *Algebra*. New Jersey: Prentice-Hall.
- Bolza, O. 1890. “On the Theory of Substitutions-Groups and its Applications to Algebraic Equations.” *American Journal of Mathematics* 13:59–144.
- Bourbaki, N. 1994. *Elements of the history of mathematics*. Berlin, Heidelberg, etc.: Springer-Verlag. Translated from the French by J. Meldrum.
- Bourdon, L.P.M. 1831. *Éléments d’Algèbre*. Paris: Bachelier père et fils.
- Cauchy, A. 1815. “Mémoire sur la détermination du nombre des racines réelles dans les équations algébriques.” *Journal de le École Polytechnique* 10:1–28. *Œuvres* (2), 1, 170–257.
- Cauchy, A. L. 1829. “Sur la résolution des équations numériques et sur la théorie de l’élimination.” *Exercices de Mathématiques*. *Œuvres*, 2nd series, 9, 87–161.
- . 1845. “Sur le nombre des valeurs égales ou inégales que peut acquérir une fonction de  $n$  variables indépendantes, quand on permute ces variable entre elles d’une manière quelconque.” *Compte Rendus*, pp. 779–797. *Oeuvres*, (1), 9, pp. 323–341.
- Cayley, A. 1854. “On the theory of groups as depending on the symbolic equation  $\vartheta^n = 1$ .” *Philosophical Magazine of the Royal Society* 7:40–47, 408–409. *Collected works*, 2, 123–132.

- . 1878a. “The theory of groups.” *American journal of mathematics* 1:50–52. *Collected works*, 10, 401-403.
- . 1878b. “The theory of groups: graphical representation.” *American journal of mathematics* 1:174–176. *Collected works*, 10, 403-405.
- Corry, L. 1996. *Modern algebra and the rise of mathematical structures*. Basel - Boston - Berlin: Birkhäuser.
- Dahan, A. 1980. “Les travaux de Cauchy sur les substitutions. Étude de son approche du concept de groupe.” *Archive for history of exact sciences* 23:279–319.
- D. Cox, J. Little, and D. O’Shea. 1997. *Ideals, varieties and algorithms*. Second edition. New York etc.: Springer.
- Dedekind, J.W.R. 1990. *Lezioni sulla teoria di Galois*. Firenze: Sansoni editore. A cura di L. Toti Rigatelli.
- Dedekind, R. Ueber die Theorie der ganzen algebraischen Zahlen. Supplement XI of (Dirichlet 1894).
- . 1981. “Eine Vorlesung über Algebra.” (*Scharlau 1981*). 59–100.
- Dehn, E. 1930. *Algebraic equations*. Columbia University Press.
- Dirichlet, P. Lejeune. 1894. *Vorlesungen über Zahlentheorie*. Braunschweig: Druck und Verlag von Friedrich Vieweg und Sohn. 4<sup>th</sup> edition. Edited and with supplements by R. Dedekind.
- Edwards, H. M. 1984. *Galois theory*. New York, etc.: Springer-Verlag.
- Escofier, J.-P. 2001. *Galois theory*. New York, etc.: Springer.
- Euler, L. 1760 - 61. “Nova methodo demonstrata theorema arithmetica.” *Novi Commentarii Academiae Scientiarum Petropolitanae* 8:74–104. Publ. 1763, *Opera omnia* (1), 3, 535-55.
- . 1736. “Theorematum quorundam ad numeros primos spectantium demonstratio.” *Commentarii Academiae Scientiarum Petropolitanae* 8:141–146. Publ. 1741, *Opera Omnia*, ser. I, vol. 2, 35-37.
- . 1758 - 1759. “Theoremata circa residua ex divisione potestatum relicta.” *Novi Commentarii Academiae Scientiarum Petropolitanae* 7:49–82. Publ. 1761, *Opera Omnia*, ser. I, vol. 2, 493-518.

- . 1770 (1771). “Observationes circa radices aequationum.” *Novi commentarii academiae scientiarum Petropolitanae* 15:51–74. *Opera omnia* (1) ,6, 263–286.
- Freudenthal, H. 1976–1977. “What is algebra and what has it been in history?” *Archive for history of exact sciences* 16:189–200.
- Funkhouser, H. Gray. 1930. “A short account of the history of symmetric functions of roots of equations.” *The American mathematical monthly* 37:357–365.
- Galois, E. 1846. “Œuvres mathématiques.” *Journal de mathématiques pures et appliquées* 11:381–444. Edited by J. Liouville. Anastatical reproduction by J. Gabay (1989) with an essay by S. Lie, *Influence de Galoi sur le développement des mathématiques*.
- . 1976. *Écrits et mémoires mathématiques d’Évariste Galois*. Paris: Gauthier-Villars. Par R. Bourgne et J. P. Azra, Préface de J. Dieudonné. Deuxième édition revue et augmenté. Réimpression autorisé, Editions J. Gabay, 1997.
- García Pacheco, F.J. 1984. “La teoría de Galois en la obra de Serret.” *Epsilon*, pp. 377–408.
- Garling, D.J.H. 1986. *A course in Galois theory*. Cambridge: Cambridge University Press.
- Gauss, C.F. 1816. “Demonstratio nova altera theoremati omnem functionem algebraicam rationalem integram unius variabilis in factores reales primi vel secundi gradus resolvi posse.” *Commentationes societatis regiae scientiarum Gottingensis recensiores*, vol. 3. *Werke*, 3, 32–56.
- Goldman, J.R. 2002. *The queen of mathematics*. Natick, Massachusetts: A K Peters.
- Graham, R.L., D.E. Knuth, and O. Patashnik. 1989. *Concrete mathematics*. Reading, Massachusetts: Addison – Wesley.
- Hermite, C. 1905. *Œuvres*, 4 vols. Edited by E. Picard. Paris: Gauthier-Villars.
